

CLIENT INTAKE FORM

Thank you for your interest in an Honos Nutrition Consulting service!

To get started:

1. Fill out this client intake form best you can.
 - a. If booking an on-site service, we will collect feed, body weight and body condition measurements during the on-site appointment to ensure accuracy.
 - b. If you need any help with the form, get in touch!
2. Email the completed form to honosnutrico@gmail.com, as well as any additional information about your horse or your concerns that you wish to include! We will follow up with confirmation, any relevant questions, book a date + time for the on-site appointment if applicable, and begin the initial diet evaluation process.
3. Once service booking is confirmed, we will provide an invoice, and payment can be made via e-transfer to honosnutrico@gmail.com.
 - a. Other forms of payment can be arranged as required.

RESOURCES

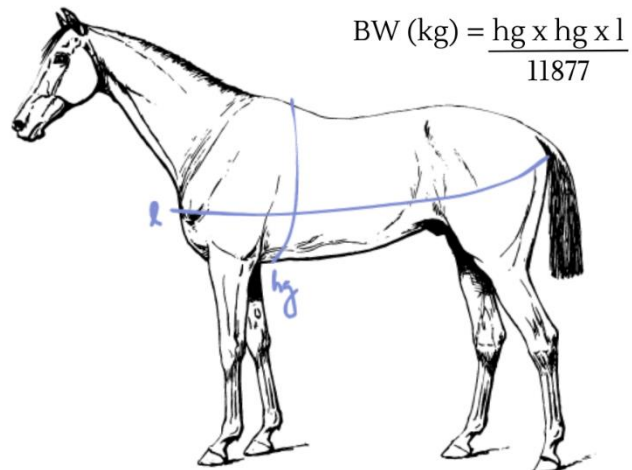

The Carroll & Huntington (1988) equation uses 2 measurements to predict a horse's body weight.

Although simple, it's been reported to be an accurate formula (~1% error), and thus can be helpful for the horse owner who does not have access to a livestock scale!

Simply use a soft measuring tape, and measure your horse's heart girth and body length in centimeters, then pop those values into the equation!

For help body condition scoring, we recommend checking out our [BCS Resource](#). We can help talk you through this process as well. Pictures from the side, shoulder angle and behind can be attached, however often underestimates fat deposition, so hands on body condition scoring is ideal.

Please do not hesitate to reach out at any time during the consultation process – and afterwards – with any questions or concerns!

$$BW (kg) = \frac{hg \times hg \times l}{11877}$$

THANK YOU!
